- 19 Inch Screen
- 450 Line Resolution
- Built-In Audio
- Blackstripe II™ Picture Tube
- Digital Comb Filter
- Front Panel Controls
- Rugged Chassis
- Black Expander Circuitry

The Toshiba CM Series

lets you view video surveillance images in vibrant, lifelike color with excellent, high-resolution detail.

Now there is a better way to provide your security operations with high quality, affordable color viewing and playback: the *Toshiba CM Series*. Whether you're monitoring an office building or warehouse, observing a casino or anywhere a watchful eye is needed, this is the one color monitor you can depend on.

Offered in 13-inch and 19-inch designs with a built-in 3-inch speaker, CM Series monitors are engineered with front panel controls to make operation simple. The on-screen prompts can be set in English, Spanish or French, while the monitor's non-volatile memory allows you to save your settings and preferences even if power is interrupted.

Most important, CM Series Monitors incorporate cutting-edge advancements in color technology, like a digital comb filter that delivers S-VHS, high-resolution video (450 horizontal lines at center). Plus, they feature exclusive Blackstripe II™ picture tubes for outstanding video performance. The Black Level Expander circuitry adds a richness and contrast to the image that is not found in conventional video monitors. Shadows, night and dark scenes are richer – not muddy or gray – for enhanced viewing accuracy.

Model CM-1310A

- 13 Inch Screen
- 450 Line Resolution
- Built-In Audio
- Blackstripe II™ Picture Tube
- Rack Mountable
- Digital Comb Filter
- Front Panel Controls
